## NEW MACHINERY INVESTMENT

Introducing the STAR SL-10 Sliding Head Lathe

Wigpool Ltd Engineering Company is proud to announce the addition of a new STAR SL-10 CNC Sliding Head Lathe to our workshop. This investment significantly strengthens our precision machining capability and increases overall production capacity.

### Machine Capability Overview

- High-precision machining of small and complex components
- Multi-axis capability for intricate geometries
- Improved repeatability for batch production
- Reduced cycle times and increased efficiency
- Enhanced overall production capacity

## What This Means for Our Customers

- Shorter lead times
- Greater machining accuracy
- Increased flexibility for technical projects
- Reliable and consistent quality

---

At Wigpool Ltd Engineering Company, we remain committed to investing in advanced engineering technology that delivers precision, reliability, and performance. We look forward to supporting both existing and new customers with our enhanced machining capabilities.
